PROFESSIONAL SUMMARY

Software Engineer with a focus on building high-performance web applications and scalable SaaS solutions. Engineered systems supporting 500+ daily active users and optimized application speeds by 25% through advanced frontend architecture. Expert in the MERN stack and Next.js, combining full-stack development with Machine Learning to deliver data-driven products.

TECHNICAL SKILLS

- **Languages:** JavaScript (ES6), Python
- **Frontend:** React.js, Next.js, React Native, Redux, Tailwind CSS, Bootstrap, HTML5, CSS3
- **Backend & Database:** Node.js, Express.js, RESTful APIs, MySQL, MongoDB, PostgreSQL, Firebase, Firestore
- **Tools & Practices:** Agentic AI, AWS S3, Cursor, Git, Jira, Postman, Vercel, CI/CD, Secure SDLC

WORK EXPERIENCE

Helping House Group of Companies (Full-Stack Developer) **Jan 2025 – Feb 2026**

- Architected and maintained high-traffic admin and vendor dashboards using **Next.js**, providing seamless management tools for **500+ daily** users.
- Accelerated page load times by 25% by implementing code splitting and **lazy loading** across the core product suite.
- Reduced data retrieval latency by 30% by integrating **Axios** and **React Query** to optimize API communication layers.
- Engineered a real-time notification system using **Firebase**, facilitating instant communication between customers and vendors.
- Facilitated API contract design in an Agile environment, coordinating with backend teams to ensure 100% data exchange reliability.

PROJECTS

B2B SaaS Vendor Management Platform

- Architected a multi-tenant SaaS using **Next.js** and **Redux**, digitizing 50+ businesses and increasing order processing efficiency by 30%.
- Engineered real-time tracking via **Firebase** and developed an analytics dashboard featuring automated, data-driven offer recommendations.
- Optimized performance & scalability by implementing **lazy loading** and **AWS S3** storage, significantly improving load speeds and asset handling.
- Integrated Secure **Payment Gateways** and a dynamic promotion engine, resulting in a 15% revenue growth for platform vendors.

Leaf Disease Detection System

- Developed a Deep Learning model using **TensorFlow** to classify agricultural diseases with 92% accuracy.
- Optimized model performance using **Transfer Learning**, outperforming traditional **Logistic Regression** models by 28%.
- Built a cross-platform user interface to visualize disease metrics for end-users.

EDUCATION

B. Tech in IT | Pranveer Singh Institute of Technology (AKTU), Kanpur, UP **2021 - 2025**
12th Grade (CBSE) | Harmilap Mission School, Kanpur **2019 - 2020**

ACHIEVEMENTS & LEADERSHIP

- Hackerrank: Achieved 5-Star Gold Badge in Problem Solving.
- Team Leadership: Directed 5-member teams for 3 technical projects, utilizing Agile methodologies to meet 100% of deadlines.
- Certification: Completed Full Stack Web Development.
- Recognition: Secured 2nd Position in Tech-Expo for technical innovation.
